This **disclaimer** is made by and on behalf of Habasit and its affiliated companies, directors, employees, agents and contractors (hereinafter collectively "HABASIT") with respect to the products referred to herein (the "Products"). SAFETY WARNINGS SHOULD BE READ CAREFULLY AND ANY RECOMMENDED SAFETY PRECAUTIONS BE FOLLOWED STRICTLY! Please refer to the Safety Warnings herein, in the Habasit catalogue as well as installation and operating manuals. All indications / information as to the application, use and performance of the Products are recommendations provided with due diligence and care, but no representations or warranties of any kind are made as to their completeness, accuracy or suitability for a particular purpose. The data provided herein are based on laboratory application with small-scale test equipment, running at standard conditions, and do not necessarily match product performance in industrial use. New knowledge and experience may lead to re-assessments and modifications within a short period of time and without prior notice. EXCEPT AS EXPLICITLY WARRANTED BY HABASIT, WHICH WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, THE PRODUCTS ARE PROVIDED "AS IS". HABASIT DISCLAIMS ALL OTHER WARRANTIES, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, OR ARISING FROM A COURSE OF DEALING, USAGE, OR TRADE PRACTICE, ALL OF WHICH ARE HEREBY EXCLUDED TO THE EXTENT ALLOWED BY APPLICABLE LAW. BECAUSE CONDITIONS OF USE IN INDUSTRIAL APPLICATION ARE OUTSIDE OF HABASIT'S CONTROL, HABASIT DOES NOT ASSUME ANY LIABILITY CONCERNING THE SUITABILITY AND PROCESS ABILITY OF THE PRODUCTS, INCLUDING INDICATIONS ON PROCESS RESULTS AND OUTPUT.

HabiPLAST®

Leader in production and sales of conveyor belts, year by year Habasit has developed a comprehensive knowledge in various sectors of production processes.

To offer a more and more complete service, Habasit created the HabiPLAST® division, specialized in supplying of thermoplastic products for engineering and industrial applications like extruded profiles, machined profiles, sliding guides, wear strips, plastic parts, ect.

Industries and applications

HabiPLAST® products are used in many industries and are the best complement for HabasitLINK® modular belts, HabaCHAIN® slat and conveyor chains, and HabaSYNC® timing belts.

Food

- Bakery/Biscuit
- Meat
- Fish
- Poultry
- Dairy
- Agriculture

Bottling Industry

Materials Handling

- Distribution centers
- General conveyor systems

Airports

- Baggage handling

Automotive

- Assembling operations

Paper

Packaging

- Packaging machinery

Fitness

- Leisure park applications
- Winter applications

Chemistry

Production

HabiPLAST® products are machined in our modern plants in Vittorio Veneto and Vigliano Biellese (Italy). The factories are equipped with the most technologically advanced systems and equipments available. CNC machines guarantee a remarkable flexibility and big productive volumes always of high quality. Our stock of standard products ensures deliveries on time. HabiPLAST® division could also realize parts on the basis of customer's drawings.

Competence and experience

Habasit application engineers and technicians are at your disposal to provide professional consulting, superb customer care and excellent support.

With more than 60 years of experience and a comprehensive global network, Habasit is able to respond to any request that you may have with the optimal solution tailored to your specific needs.

Food

- Wear strips and guide profiles
- Customized parts

Spiral applications

- Cage bars
- Wear strips for modular belts

Bottling industry

- Wear strips for table top chains
- Guide profile
- Curves for side flexing chains

Bottling

- Bottling components
- On drawing parts

Materials Handling

- Wear strips
- Side guide profiles

Chemistry

- On drawing parts

Habasisit standard engineering polymers

Habasisit offers a wide range of materials in order to satisfy all customer's needs.

HabiPLAST®

HabiPLAST® is a polyethylene with high molecular weight, obtained by a low pressure polymerization process. The medium molecular weight of HabiPLAST® is between 0.3 and 8 millions of g/mol (measured by a viscosimeter).

Together with molecular weight also mechanical features increase, such as: impact resistance, tensile strength at high temperature, energy absorption under high stress level, etc.

Acronym	Family	Habasisit denomination
PE	Polyethylene	HabiPLAST®
PA	Polyamide	Habilon
POM	Polyoxymethylene	Habital
PET	Polyethylene terephthalate	Habipet
PTFE	Polytetrafluorethylene	Habifluor
PVC	Polyvinylchloride	Habivit
PP	Polypropylene	Habipro

HabiPLAST® variant	Material properties
UHV	Polyethylene ultra high molecular weight (4.000.000)
UHV-TP	Polyethylene ultra high molecular weight (4.000.000) - TriboPlus™
UHR	Polyethylene high molecular weight (1.000.000)
H/SA	Polyethylene high medium molecular weight (500.000/700.000)
HE/M	Polyethylene medium molecular weight (300.000/500.000)

HabiPLAST® features

- Low coefficient of friction
- Self-lubricating
- Good vibration and noise absorption
- High wear resistance
- High chemical resistance, no corrosion
- No moisture absorption
- High dielectric strength
- High impact and fracture strength

HabiPLAST® TriboPlus™ represents a new generation of polyethylene with the highest performances in terms of low friction coefficient and high wear resistance.

Compared to the standard high-density polyethylene (UHV), laboratory tests showed the following properties of HabiPLAST® TriboPlus™ (UHV-TP):

- Reduction of friction and power consumption of about 50%
- Nearly complete absence of wear
- Much higher load limit

HabiPLAST® guide profiles are the best solution for improving performances and reducing maintenance of roller chains, V-belts or round belts. Habasit offers a full range of guides and can produce any kind of profile according to customer's specifications.

HabiPLAST® key features

- Excellent sliding of the chain
- Great wear resistance
- Low coefficient of friction (less driving power required)
- Low noise
- Good resistance against impacts also at low temperature
- High chemical resistance
- Easy and quick assembly
- Corrosion resistance

Standard material and length

- Standard material for guide profiles is HabiPLAST® UHR/G green
- Standard length is 3 m
- Other materials and lengths up to max 6 m are available on request

Type	Material	Color	N° of clamps per box
FC-20	HabiPLAST®	Black/Green/White	200
FC-20	Habilon	Black/White	200
FC-20	Habital	Black/White	200

FC-50 connecting element for CI-16/CIE-16 metallic profiles

Type	Material	Color	N° of clamps per box
FC-50	HabiPLAST®	Black/Green/White	100
FC-50	Habilon	Black/White	100
FC-50	Habital	Black/White	100

- Standard lengths for CI-16/CIE-16 metallic profiles are 3 and 6 m
- Screws not included. Specify the color and the material in the order

HabiPLAST® extruded profiles are the best complement for Habasit products as HabasitLINK® modular belts, HabaCHAIN® slat and conveyor chains and whenever you need:

- Great wear resistance
- Low coefficient of friction
- Low noise
- Good resistance against impacts also at low temperature
- High chemical resistance
- Easy and quick assembly
- Corrosion resistance

HabiPLAST® guides are used above all in bottling industry as complement of our extruded profiles. Habasit can realize curves by CNC, machining with angles and dimensions according to customer's specifications. Standard materials are UHR/Black or UHV-TP/Cobalt blue but other materials and colors are available.

The main advantages of HabiPLAST® guides are:

- Excellent sliding of the chain
- Great wear resistance
- Low noise
- Good resistance against chemicals
- Easy and quick assembly
- Lighter conveyor frame

Straight tracks

Notes

Habasit has developed HabaSYNC® timing belts. These high quality polyurethane timing belts are used in conveying and linear movement applications specially where motion control, product placement, component positioning and synchronization are essential for optimum performance.

The main advantages of HabiPLAST® guides in relation to timing belts are:

- High chemical resistance
- Wear and corrosion resistance
- Low noise

HabiPLAST® is available to fit standard HabaSYNC® belts and can be supplied with or without metallic inserts. Standard material for HabaSYNC® guides is UHR/G green, different materials are available on demand.

Comprehensive services are central to Habasit's belting solution approach.

As committed partners to our customers, we are dedicated to sharing our knowledge and to providing you with full support.

Designing the future

Our engineering department uses the most advanced CAD/CAM systems. We can machine parts on the basis of customer's drawings, quickly and always with excellent quality.

CNC machining tools

HabiPLAST® plants are equipped with the state of the art machining tools. All the machines are connected by LAN and the production flow is checked in real time, in order to provide always deliveries on time.

Short lead times

Quick deliveries are guaranteed also by HabiPLAST® stocks of standard materials. Chain guides and extruded profiles are always available in our warehouse.

Services at your hand

We are where you are, and our dedicated staff is always available for your needs.

Customers first

At Habasit we understand that our success depends on your success. This is why we offer solutions, not just products; partnership, not just sales. Since our foundation in 1946, Habasit has brought this understanding of customer needs to life every day and for every application. That's why we're the No. 1 in belting today. Worldwide. Learn more on www.habasit.com

Committed to innovation

Because our customers' belting challenges and needs never cease, we consistently dedicate a substantial percentage of our employees and resources to the research and development of new products and solutions.

Certified for quality

We deliver the highest quality standards not only in our products and solutions, but also in our employees' daily work processes. Habasit AG is certified according to ISO 9001:2008.

Worldwide leading product range

Habasit offers the largest selection of belting, conveying, processing and complementary products in the industry. Our response to any request is nothing less than a specific, tailor-made solution.
